

CLIPSREEL TUTORIAL- How to Create and Add Amazon Associate Key

Follow these simple steps below:

1. Go to aws.amazon.com then click on Sign In to the Console.

2. Once logged in, click on the Welcome to AWS dropdown then click on My Security Credentials.

\rightarrow G (console.aws.amazon.com/console/home?nc2=h_ct&src=header-signin®ion=us-east-1	어 🏠 🖬 🎭 🛛 🛛

	AWS services	Access resou Orders and Invoices My Security Credentials
	Find Services You can enter names, keywords or acronyms. Q. Example: Relational Database Service, database, RDS	Access t Console Sign Out g the AWS
	▼ Recently visited services	Explore AWS
		EC2 Spot Instances Bun fault-tolerant workloads on Spot Instances and save up

3. A pop-up will then appear saying you're accessing the security credentials page. Click on Continue to Security Credentials, then find the Access keys option.

F ()	You are accessing the security credentials page for your AWS account. The account credentials provide unlimited access to your AWS resources. To help secure your account, follow an AWS best practice by creating and using AWS Identity and Access Management (IAM) users with limited permissions. Continue to Security Credentials Get Started with IAM Users Don't show me this message again	AWS Global Support Int (IAM) users, use the IAM Conce. Forums, and AWS Support. For rely, do not share it, and change

5. After you created your Access Key, Expand the "Access Keys" section. This section contains all of your current access keys. You will likely need to make a new one (you can have 2 active key pairs per account). Feel free to use an existing one if you have the secret key already, otherwise click on the Create New Access Key button.

Important Change	- Managing Your AW	/S Secret Access Keys			

We also recommend clicking the Download Key File button and storing this in a secure location, like a password manager as you cannot retrieve the Secret Key from an existing Access Key after you click Close. Make sure you have it otherwise you will need to de-activate an old key and create another new one.

Download Key File Close			
Important Change - Managing Your AWS Secret Access Keys			

Your keys should look something like these:

Access key ID example: AKIAIOSFODNN7EXAMPLE Secret access key example: wJalrXUtnFEMI/K7MDENG/bPxRfiCYEXAMPLEKEY

To add these keys to ClipsReel, on your dashboard, click on the Profile dropdown then click Accounts.

2. Scroll to the bottom part and you will see the option to enter your Amazon Associate Keys. Enter all the necessary information then click on Add.

****Note:** You will not find Affiliate ID on this tutorial for privacy and security purposes , but users with Amazon Affiliate account will have an Affiliate ID.
